You are not alone

In fact, 1 in 4 people have gastroenterology (GI) symptoms like yours. And while GI symptoms can be disruptive, they are also manageable with the right support team.

Our GI specialists are here to listen and help you with a comprehensive array of screening, diagnostic testing and treatment resources.

HEALTH RISK ASSESSMENT

What is Your GERD Risk?

Take our online quiz to find out your risk of suffering from prolonged health effects from frequent heartburn and indigestion.

We are here to listen

"In my nearly 25 years of practicing medicine, I have learned that listening to my patients is one of the most powerful and effective tools I possess to diagnose and treat their digestive tract issues."

JOHN G. DOWD, DO | GASTROENTEROLOGY

VIEW BIO

"Learning about my patients' lives outside of our clinic visit helps me better understand their symptoms and craft a personalized treatment plan. Every patient is unique and deserves individualized care."

JENNIFER NAYOR, MD | GASTROENTEROLOGY

VIEW BIO

"It is a real privilege to sit with patients, hear their stories and provide reassurance, support and a plan to get them better. We listen so that you can go on with your life without being distressed by whatever's bothering you."

MICHAEL DESIMONE, MD | GASTROENTEROLOGY

VIEW BIO

Committed to your safety

Emerson Hospital's Concord Gastroenterology Associates is committed to providing the expert medical care you need in a safe environment. The measures implemented at our location includes: increasing our quantity of PPE, performing staff screenings, thorough and enhanced cleaning, updating common areas to allow for social distancing, encouragement of hand hygiene, and enhanced infection control policies.

Concord Gastroenterology Associates a key partner in recovery

Kacie Babbit, an accomplished equestrian who attends Bryant University, has suffered from stomach pain for more than a decade. Learn more about her road to recovery.

KACIE'S STORY

GI issues or COVID-19?

Dr. Michael DeSimone talks about common gastrointestinal (GI) symptoms and how to tell if it might be COVID-19.
